

Please join the
FRIENDS OF HUDSON PARKS
for an Amazing Amphibian Hike

Saturday, March 18, 2023, 6:45-8:30 PM
Hudson Springs Park
7095 Stow Road - Meet by the restrooms

As spring arrives the frogs and toads begin calling out their choruses of croaks and salamanders emerge. Both will migrate to vernal pools joining other creatures to maintain the cycle of life. On our hike we will be looking and listening for amphibians and any other signs of wildlife along our way.

This event is taking place rain or shine as amphibians love both!!! Please bring a flashlight as our hike will end after dark and be prepared to go off trail and cross wet muddy areas if that's where our hike leads.

Please sign up by emailing friendsofHUDSONparks@gmail.com

The hike will be led by Rick Beam, Friends of Hudson Parks Board Member and herpetology enthusiast.
